(save over \$300 a year)

Primary PC \$35.00
Additional PCs \$25.00
(save over \$600 a year)

How the INVISUS services work:

Unlimited Service – by Subscription

The professional computer services offered by **INVISUS** are **subscription-based services**. That means instead of paying those high per minute and per incident service fees typically charged every time you need a little help, you've got **unlimited access** to all the expert help you need – for one low monthly fee!

In other words, you'll **never again** have to put up with problems and hassles with your computer. You'll never have to put off getting your system checked out and fixed up. This is the **biggest no-brainer** ever for hassle-free computing! Relax. We'll take care of it all for you.

Service Setup

Your personalized care begins from the day you sign up. Each of the services we offer starts with a one-time initial service setup on each computer. This is done personally by one of our trained technicians and includes an initial **system assessment, checkup, cleanup, professional software programs** including **installation and configuration assistance**, and **more** (depending on the type of service). Because you are on a subscription to our service, the initial service work on your computer is done for a HUGE DISCOUNT over what would typically be charged for comparable services.

Ongoing Service (First month FREE!)

Day after day, month after month, you continue to get **unlimited access to our trained technicians**. Your ongoing monthly service also includes (depending on your service) **automatic software updates, free software upgrades, identity theft insurance, safety advisory alerts, and more**. Our job is to make it so your computer is hassle-free and that you never really have to contact us for help. But in the event your computer starts acting up or you need our assistance, we are here for you as often as needed. You'd pay several hundred dollars a year to get this level and quality of service anywhere else on a per minute or per incident fee basis. Your subscription service with INVISUS will **save you big money** every year!

Help by Phone and Remote Internet Connection – Quick and Easy!

Ninety percent of computer problems can be taken care of remotely without having to take your computer apart, ship it out, or haul it down to a repair shop. We make getting professional help FAST and EASY no matter where you are in the world. We'll help you **by phone**, or if needed, we'll personally do it all for you by securely **connecting to your computer over the Internet** after you grant us access. You can continue working, run your errands, or just kick back and relax while we work on your computer.

It doesn't get any easier or more hassle-free!

Personalized, One-on-One Care

Our friendly technicians are here to help make your life easier. You'll quickly begin to rely on us as **your personal tech team**, and we'll get to know you as a valued customer and friend.

Because we keep track of the **entire history** of work done on your computer, we'll know exactly how to **quickly and easily** keep your computer **hassle-free** for you.

We are like the doctor who you always go to because he or she personally knows your health history and knows your wellness needs.

No one will know your computer's needs better than we will. That's personalized care. Once you've tried it, you'll never want to be without it.

Big Savings!

Our subscription services will save you significant amounts of money starting with your initial service setup, and again every time you get help from our trained technicians.

We've saved our subscribers **millions of dollars** of their hard earned money in just the last couple of years alone!
